Jeevan K B

Bull Temple Road, Basavanagudi, Bengaluru, Karnataka - 560004

+91-8317453797 jeevankenchalli514@gmail.com GitHub LinkedIn

Career Objective

Computer Science engineering student with a strong foundation in Python and AI/ML, experienced in developing projects involving machine learning, deep learning, NLP, and computer vision. Seeking an opportunity to apply technical skills and build innovative AI-driven solutions.

Education

City Engineering College **2023 – Present**
Bachelor of Engineering in Computer Science and Engineering[CGPA: 8.48] *Bengaluru, Karnataka*

Akshara PU College **2022 – 2023**
PUC [Percentage: 85.85] *Shivamogga, Karnataka*

Shri Jnanakshi Vidyaniketan English Medium High School **2020 – 2021**
SSLC [Percentage: 83.84] *Davanagere, Karnataka*

Technical Skills

Languages: Python (Core), SQL, JavaScript (Basics)

AI/ML: Machine Learning, Deep Learning (Basics), NLP, NumPy, Pandas, Scikit-learn

Frameworks/Technologies: Flask, Django, FastAPI, TensorFlow, OpenCV, React.js, HTML, CSS

Developer Tools: VS Code, Jupyter Notebook, Google Colab, Postman, MySQL Workbench

Version Control: Git/GitHub

Coursework: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Experience

AI Intern **6 Months**
Recursive Coders *Vijayanagar, Bengaluru, Karnataka*

- Gained practical experience in Artificial Intelligence and Machine Learning through hands-on development and technical tasks.
- Worked with Python and AI/ML concepts to strengthen problem-solving and implementation skills.

Projects

ScamShield AI – Fraud Detection Platform (Source Code)

- Developed a Python-based AI cybersecurity platform to detect scams across SMS, WhatsApp, emails, URLs, screenshots, and PDF invoices.
- Implemented NLP-based scam classification, OCR text extraction, and risk scoring using Flask, Scikit-learn, OpenCV, and Tesseract OCR.

WeatherGPT – Conversational AI Weather Platform (Source Code)

- Developed an AI-powered weather platform for conversational forecasting, weather alerts, and climate information.
- Integrated live weather APIs, natural language processing, location-based forecasts, and contextual advisories.

VoxVeritas – AI Voice Detection (Source Code)

- Developed an AI-powered system to distinguish synthetic AI-generated voices from human speech using acoustic analysis.
- Built a Python-based audio detection pipeline with a TypeScript web dashboard.

Smart Voting System Using Face Recognition (Source Code)

- Developed a Python-based voting application using OpenCV, Flask, and K-Nearest Neighbors (KNN) for face recognition.
- Implemented blink-based liveness detection and hashed voter verification to help prevent duplicate voting.

Additional Information

- **Hackathons/Competitions:** Smart India Hackathon (SIH) 2026 – First Round Selection (WeatherGPT, PS 26068); Elite Hack 1.0; 3SVK National Cloud & AI Innovation Challenge.
- **Certifications:** National Cloud & AI Innovation Challenge — Elite Hack 1.0 — IIT Madras – GPAi — Devcation Delhi 2026
- **Languages:** English, Kannada, Hindi
- **Interests:** Open-Source Software, Geopolitics, Cricket, Volleyball.
